

ARCHITECTURAL
CYLINDER LIGHTING

TIMELESS SYMMETRY

ARCHITECTURAL CYLINDER LIGHTING offers a sleek, modern lighting solution that combines both aesthetics and functionality. With their minimalist design, cylinders provide clean lines and a timeless look, making them an ideal design

choice for contemporary, industrial, or architectural spaces. Their compact, powerful form allows for focused, directional lighting; perfect for illuminating task areas, highlighting focal points, or creating a dramatic visual impact.

CYLINDRICAL LUMINAIRES FOR EVERY DESIGN

Beyond their visual appeal, our cylinders are incredibly versatile: choose to surface-mount, suspend, recess, wall-mount, or add to a track system; they are designed for spaces ranging from high ceilings to exterior environments.

ADJUSTABLE RECESSED CYLINDER

Combines the concept of an integral driver pot light with a sleek cylindrical design to deliver a clean, modern aesthetic, while its adjustable feature allows you to direct light exactly where it's needed (tiltable up to 60°).

CEILING MOUNT CYLINDERS

Designed for flush or pendant installation, they can be mounted flush for a subtle, low-profile effect or suspended as a pendant for added visual impact, bringing a timeless aesthetic that seamlessly integrates into any space.

MULTIFUNCTIONAL CYLINDERS

The ultimate in versatility and modern engineering: designed for surface mounting, ceiling pendant installation, or integration with our Story Series H-style Track Lighting Systems, these lights help designers adapt effortlessly to an entire lighting plan while matching the same look.

CYLINDER WALL SCONCES

With a minimalist design and durable construction, their cylindrical form provides a clean, sophisticated look while offering powerful, focused lighting and additional optics options (for 15° or 25° beam angles) to enhance ambience and safety. A designer's favorite for complementing a contemporary façade and adding a touch of elegance to outdoor spaces.
